

Leading turbine innovation.

The MTT Turbine **SUPERBIKE**

Powered by a Rolls Royce-Allison turbine engine and demonstrating over 320 HP and 425 FT/LBS of torque, the MTT Turbine SUPERBIKE has been named the **"Most Powerful Production Motorcycle"** by Guinness World Records.

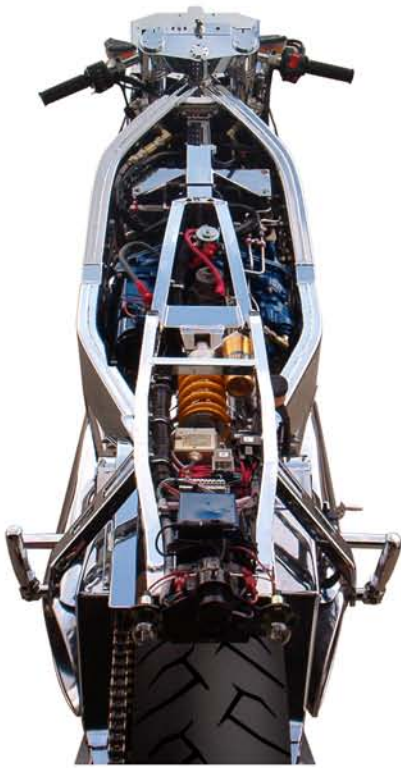

With a top speed of over 250 MPH, the MTT Turbine SUPERBIKE is the **fastest street-legal production bike** in the world...

*"It's like the hand of God pushing you in the back...
I've ridden a lot of fast bikes but nothing pulls like this."
-Jay Leno, Popular Mechanics*

*"Y2K, even under full power, tracks like a bullet train...
And the strangest thing is the complete lack of vibration.
You hear the turbine but don't feel the turbine, except for
the fact that it's trying to smoothly compress all your
vertebrae into one dense donut."
-John Burns, MotorCyclist*

"It's bloody mad and extremely scary... it feels like bungee-jumping, except with the bungee pulling you forwards and not upwards. The sheer sense of uncontrollable acceleration building and the wind noise rushing up to meet you."

-John Cantlie, Motor Cycle News

SPECIFICATIONS

Engine:	Rolls Royce-Allison 250 series gas turbine
Power:	320 HP @ 52,000 rpm (286 HP @ rear wheel)
Torque:	425 ft/lbs @ 2,000 rpm
Output RPM:	6,000 rpm
Compressor Speed:	54,000 rpm
Weight:	500 lbs, dry
Frame:	aluminum alloy
Fairings:	carbon fiber
Rake:	27 degrees
Seat Height:	31.5"
Wheel Base:	68"
Wheels:	17" carbon fiber, Dymag
Tires - Front:	120 60ZR17, Pirelli
- Rear:	200 50ZR17, Pirelli
Brakes:	3x320 mm floating system- 4-piston calipers, Brembo
Shocks:	mono-shock adjustable, oleopneumatic, Ohlins
Front Forks:	55 mm, inverted
Fuel:	diesel, kerosene, Jet A
Fuel Capacity:	8.5 gallons (34 liters)
Lubrication:	dry-sump, 3.5 quarts turbine oil
Transmission:	2-speed automatic
Rear View:	rear-mounted camera with LCD color display, plus side mirrors
Seat:	single or double
Colors:	infinite custom colors

Price:

\$150,000
